carbonized bamboo plywood for furniture material and fencing

Carbonized color also called a Chocolate / caramel color. Carbonized color has a darker color tone, steamed under high temperature in the pot for 15 minutes to change from natural to carbonized, it is also called caramel color.

Carbonized color also is processing under high temperature steamed so to get rid of the origin water and sugar and other chemical composition in the origin bamboo strip, so to keep all the bamboo panel is free of enzyme or woodworm or out of shape ..so to sure of the bamboo panel be the most health, most ECO-friendly, most safe materials for furniture, door, cabinet, bed, kitchen counter top, worktop , kitchen chopping board

All the bamboo with structure of horizontal or vertical or cross, the color can be Carbonized color. Carbonized color is cheap then natural color in cost, as it easier to control the color, so carbonized color is the most popular color in big furniture making like counter top, door, bed, office tabletop , worktop, and big cabinet etc.

Bamboo Panels normal size :

Regular length of 1000mm、2000mm、2200mm、2500mm
