Natural Solid bamboo stair treads

Solid Bamboo stair and treads of natural colors most of time used as modern home depot,

Since Natural color which is

clear light white color. **So to keep the color concordant without any color difference and stain, it can increase home brilliance and reduce pressure for modern people life.**

But here Natural bamboo color not mean bamboo origin color , **the true is even we have to keep natural color but** bamboo

strand /strip need to be boil down under high temperature ,

because the origin bamboo has high water moisture and sugar and other kinds of chemical composition , all these composition will easy cause woodworm, enzyme, out of shape etc..

so to avoid these problem, after steamed and boil , all the bamboo panel will be

the most health, most ECO-friendly, most safe materials for Interior home using especially for Home depot stairs and risers.

So bamboo natural color cost is higher than carbonized color,

people will ask why, the reason is **Natural color** has higher requirements to keep color consistency from first bamboo strip/strand choosing , and then to control color not change during chemical processing , we strictly control our solid bamboo boards quality , and choose top A quality bamboo boards to produce to bamboo stairs and riser for you .
